Automatic Tracking Cameras Market - 2019-2025

## Report Summary:

The automatic tracking camera is an integrated camera that integrates and expands the functions of the lens, the pan/tilt, and the ordinary camera. The automatic tracking camera can automatically recognize the image information. When the image moves, it follows the moving image, which can recognize the motion of the object within the monitoring range. The automatic control of the gimbal tracks the moving objects, and all movements of the objects are clearly transmitted to the monitor.
