LONDON, GREATER LONDON, UK, July 23, 2019 /EINPresswire.com/ -- The [adhesives market](#) expected to reach a value of nearly \$92.9 billion by 2022, significantly growing at a CAGR of 9.0% during the forecast period. The growth in the adhesives market is due to increasing mergers and acquisitions (M&A) and emerging market growth.

However, the market for adhesives is expected to face

certain restraints from several factors such as increasing interest rate and reduction in free trade.

The adhesives manufacturing market consists of the sales of adhesives, glues and caulking compounds by entities (organizations, sole traders or partnerships) that produce adhesives, glues and caulking compounds.

Trends In The Adhesives Market

Adhesives are being developed to increase efficiencies of engineers and to increase assembly and processing speed. Since mechanical fasteners do not allow expansion or contraction of joined materials during temperature variations, adhesives are being used to accommodate movements caused by thermal expansion of substrates even after they are fully cured. Adhesives are being used to join composites instead of fasteners because drilling holes can damage composites which leads to loss of time and money.

Potential Opportunities In The Adhesives Market

With increase in technology development and increased demand in the automobile industry, the scope and potential for the global adhesives market is expected to significantly rise in the

forecast period.

The top players in the Adhesives market include 3M, Henkel, Sika AG, Dow Chemical Co, BASF.
