

European Cyber Security for Industrial Control Systems conference returns to London United Kingdom this October 29/30th

This fall the Cyber Senate will address the escalating cyber security challenges associated with the adoption and convergence of operational technologies

LONDON, UNITED KINGDOM, July 29, 2019 /EINPresswire.com/ -- Protecting essential services and control system networks is imperative and in many cases, neglected in relation to embedded systems in modern architecture.

This fall, the [Cyber Senate](#) will address the escalating cybersecurity challenges associated with the adoption and convergence of operational technologies in enterprise facing architecture. Leading cybersecurity subject matter experts will discuss how we can better defend our assets by ensuring engineering are tightly integrated into new connectivity models, and how [industry 4.0](#) adoption is creating robust efficiencies for industrial control businesses.

Industrial sectors such as nuclear, maritime, smart grid, utilities, water and insurance, will share how they are responding to evolving cyber threats. Practitioners will hear from organisations who have been victims of large scale public attacks, recovered and used their experience to define their future strategy. The conference includes over eight-panel sessions for participants to address their questions directly to experts as we dive deeper into topics such as effective supply chain risk management, getting the fundamentals of asset inventory correct, defining preparedness, NIS implementation and mitigating [IoT cyber attacks](#).

“

The leading ICS cyber security conference in UK. The quality of the speakers was absolutely excellent and debate amongst delegates first class.”

Former Head of Nuclear Cyber Security, ONR

Will your organisation embrace Industry 4.0, and if so, how will they establish trust and confidence? How will you implement security in this new paradigm? Will those organisations not adopting new technologies remain competitive?

6TH ANNUAL INDUSTRIAL CONTROL CYBER SECURITY EUROPE

OCTOBER 29|30 2019

A promotional banner for the 6th Annual Industrial Control Cyber Security Europe conference. The background is a night view of a city with a prominent Ferris wheel and lights reflected in water. The text is overlaid in white and teal. At the top, it says "Protecting and Securing Digital Transformation" in a smaller font. Below that, the main title "6TH ANNUAL INDUSTRIAL CONTROL CYBER SECURITY EUROPE" is written in large, bold, white capital letters. At the bottom center, there is a teal button with the word "REGISTER" in white capital letters. Below the banner, the event details are listed in black text: "Cyber Senate Industrial Control Cybersecurity Europe conference London United Kingdom October 29/30th 2019".
