However, the market for fabrics manufacturing is expected to face certain restraints from several factors such as lack of available resources, workforce issues and increasing

inventory levels.

The fabrics manufacturing market consists of sales of fabrics by entities (organizations, sole traders and partnerships) that produce fabrics, mostly through processes such as weaving and knitting. A fabric is a cloth formed by weaving, knitting, tufting or bonding together. Fabric mills include broad woven fabric mills, narrow fabric mills, non-woven fabric mills and knit fabric mills. They are engaged in weaving fabrics, felts and narrow fabrics and they also further finish and fabricate fabric products.
