SANFORD, NORTH CAROLINA, USA, July 30, 2019 /EINPresswire.com/ --

NamFon Nutrition proudly announces that the company's [keto diet pills](#) are now part of "Amazon's Choice," a popular feature of the marketplace to identify successful products. To date, many customers report that they have used the pills to rapidly achieve ketosis, leading to quick and healthy loss of fat. Each pack comes with 60 capsules, enough to last 30 days.

All ketogenic diets are built around ketosis, a specific metabolic state of the body. "During this phase, the body starts burning fat for energy instead of carbs," explains a spokesperson from NamFon Nutrition. "The ultimate objective of all ketogenic diets is to achieve the ketosis phase quickly.

Priming the body to trigger endogenous ketone production takes time and effort. It has been clinically proven that exogenous BHB ketones can raise blood ketone levels almost immediately without the need for weeks of dieting or fasting."

The [keto BHB](#) pills from NamFon Nutrition contain exogenous ketone BHB salts to jump-start or maintain ketosis, adding more energy and fat burning power. "Within twenty minutes of its consumption, the product provides an energy and brain boost. It helps overcome the blood-brain barrier by supplying the brain with instant energy and mental clarity," adds the company spokesperson.

Users suggest that that the product also helps avoid fatigue, headaches, muscle cramps, nausea, [keto](#) flu, and carb cravings.

"I like to do my due diligence to be safe before buying supplements. There are a lot of products out there that promise weight loss even without putting in the work. This one doesn't do that -- they actually tell you to follow the diet to get the best result and even give you a guide to help you. I haven't found any other supplements that do more than just selling you a pill," an impressed user mentioned in her Amazon review.
