Key Players

Some of the major players in the Algae Products Market are Algatechnologies, BASF, CP Kelco, Cargill, Corbion, Cyanotech Corporation, DSM, Dowdupont, E.I.D. Parry, Fenchem Bio-tek, and Ingredion.

The report on global Algae Products Market has profiled some distinguished vendors as well as promising new market entrants.

Key market segments covered

By Source

- Red Algae
- Brown Algae
- Green Algae
- Golden Algae
- Others (Yellow Algae)

By Application

- Nutraceuticals
- Food
- Cosmetics
- Pharmaceuticals
- Chemicals
- Fertilizers
- Animal Feed
- Others (Biofuel, Sewage disposal)

By Region

- Asia Pacific
- Europe
- North America

- South America
- Rest of the World

Market Dynamics

The report on global Algae Products Market has explored and mentioned several factors that are promoting positive growth in the Algae Products Market over the assessment period. It has studied volume trends, value aspects of the product/service, along with the pricing history. Some significant factors having a larger impact on the market include technological advances, growth in the global population, the impact of different government policies introduced, and the demand and supply mechanism functioning in the market.

Segmental Analysis

By geography, Algae Products Market is divided into Asia Pacific, Europe, North America, South America, and Rest of the World. North America leads the Algae Products Market due to a large number of various companies dedicated to using algae for nutraceutical, animal feed products & Global Oil companies focussed on Algae Biofuel. Asia-pacific is the second largest market due to the massive production of seaweed in China. Increase in consumption of nutraceuticals, pharmaceuticals due to rising prosperity & Animal nutrition products due to extensive aquaculture will drive the growth of the algae products market in Asia-pacific. Owing to these reasons, Asia-pacific is expected to be the fastest growing segment.

The global Algae Products Market is segmented and analyzed on the basis of different aspects to gain a better understanding for the conjecture period. Such segmentation includes regional segmentation, among other aspects such as type, components, end-user industries, and applications. The regional segmentation has been carried out for five regions of Asia Pacific, North America, South America, Europe, and the Middle East & Africa. The report on WGR includes an in-depth study of the Algae Products Market in each regional segment mentioned above.

Research Methodology

Algae Products Market is segmented by algae type and application. By Algae type, the market is segmented into Red Algae, Brown Algae, Green Algae, Golden Algae, Others. Certain red algae is directly consumed as food in Japan (Nori) and Western Europe (Laver). Carrageenan is a compound obtained from red algae that are widely used to stabilize emulsions in paints, pharmaceuticals, ice cream, and other products. Agar a product obtained from red algae which is used in the manufacturing of pharmaceuticals and cosmetics, as a culture medium for laboratory microorganisms, and for other purposes, including the preparation of jellied desserts and soups. Industrial chemicals are known as alginates. These alginates used as thickening agents and as stabilizers for emulsions in the industrial preparation of foods and pharmaceuticals, and for other purposes. Brown & Red Algae dominate the market.
