The military aviation industry is prognosticated to attract investments owing to the introduction of new and advanced aerial vehicles. Technological advancements are anticipated to dominate the growth pattern of the industry over the next couple of years. The introduction of unmanned aerial vehicles is likely to revolutionize the revenue growth of the industry in the upcoming years. The governments and organizations widely adopt the technology as it ensures nil or minimum human intervention. It has been designed for minimizing the threat to human lives. In addition, it further enhances the efficiency of the disaster management organizations, thus, supporting industry expansion. Rising threat of cross border terrorism and civil unrest is likely to fuel demand for UAVs in the nearby future. This, in turn, is projected to influence revenue creation in a positive way over the next couple of years.
