The industry is expanding into new verticals as well as geographies to grab opportunities which are higher than provided by mature markets. At the same time, various economies of the world are still deprived of the Internet, and many people lack access to high-speed data connectivity. Policymakers at both national and international levels need to mitigate impediments, which hinder access to digital technologies. Digital technologies such as cloud computing, augmented reality, virtual reality, big data, drones, three-dimensional printing, and "the Internet of things" are certain to influence economic growth as well as development. Economies lagging should start assessing opportunities and pitfalls alike and prepare themselves for the digital revolution.
