Every US Navy ship vessel built up to 1980 contained asbestos. Extreme exposure to asbestos may have occurred to US Navy Veterans if they were assigned to a navy ship's engine room, as a machinists mate, electrician, plumber/pipfitter, mechanic, in engineering, as a repair crew member, as a crew member on a nuclear submarine or as a member of the Navy Seabees. Additionally, a US Navy Veteran could have received extreme exposure to asbestos if they were required to stay on their ship or submarine for a major repair, overhaul or retrofit at a shipyard. Asbestos exposure was so extreme on US Navy ships and submarines, about one third of all US citizens diagnosed with mesothelioma each year are Veterans of the US Navy. <https://USNavyMesothelioma.Com>
