

Tarps Now Announces Expansion of Flame Retardant Tarp Fabrics Division

Tarps Now Company Expands Tarp Fabrics that Improves Workplace Safety

ST. JOSEPH, MICHIGAN, UNITED STATES, August 6, 2019

/EINPresswire.com/ -- The rapid growth

of Tarps Now® has prompted the expansion of its proprietary lines of tarp fabrics that feature flame retardant properties needed in heavy manufacturing processes, fabrication and workplace safety applications where sparks, UV flashes, spatter, and heated dust negatively impact workplace safety and diminishes employee productivity.

In addition to these new lines of flame-retardant tarp fabrics, Tarps Now® has also increased its commitment to merchandising flame resistant transparent vinyl that provides increased levels of protection against light sparks and spatter. This variety of flame resistant tarp fabrics are also well suited for applications where vertical installations are preferred, such as translucent protective screens, curtains or blankets used in manufacturing processes.

The company offers a wide range of standardized sizes and colors, as well as a nearly unlimited range of custom configuration options where variations in fabric weights, sizes, coloring, and fittings are required.

Tarps Now® Flamer Resistant Fabric Selection Options:
