

# Automotive Steering Sensors Market 2019 Global Trends, Share, Growth, Analysis, Opportunities and Forecast To 2026

---

PUNE, MAHARASHTRA, INDIA, August 8, 2019 /EINPresswire.com/ -- Summary:

A new market study, titled "Discover [Global Automotive Steering Sensors Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

## Introduction

### Global Automotive Steering Sensors Market

The recent report found on the Wise Guy Reports (WGR) website on the Automotive Steering Sensors Market is a result of an extensive study done by adept analysts. There are several potent figures and facts to grace the report and they have been estimated from data collected by experts for a forecast period 2025. Several prospects in diverse fields have been announced in the report that could impact the current market proceedings and help in decision-making process of various companies. It has historic details, various projections, market dynamics, demographic changes, and others to enable a deep-diving into the market. The report also includes a lot of strategic moves implemented by top-notch market players that could improve individual market stances and assist in the holistic growth of the market. The process also reveals various dynamics of the market interplaying to holistically improve the market forecast.

Method Electronics, Infineon, Hellas, Valeo, Robert Bosch GmbH, NXP Semiconductors, DeAmertek Corporation, Honeywell, Sensata Technologies and Bei Sensors are the well-known players in Steering sensors market.

## Key market segments covered

### Type

- Angle and Torque Sensors
- Motor Position Sensors
- Health Monitoring Systems
- Multi-Functional Sensor Systems
- Others

## By Technology

- Magnetic
- Contacting
- Others

#### By Region

- Asia Pacific
- Europe
- North America
- South America
- Rest of the World

#### Market Segment Analysis:

The Global Steering sensor market report segments the market by type, technology type, and geography. By type, the market can be segmented as- Torque and angle Sensors, Motor Position Sensors, Health Monitoring Systems and others. Torque and angle sensors have the largest market. However, Health monitoring systems have a vast potential for growth in the coming years. National Highway Traffic Safety Administration (NHTSA) has conducted a study that identifies certain medical conditions that contribute to motor vehicle crash causation. It was found that about 1.3% of all crashes included in this survey were caused by driver reported medical emergencies and 84% of the drivers in these emergencies experienced seizures, blackouts or diabetic reaction before the crashes. Thus, there is a strong premise for monitoring the health status of drivers through active or passive methods. Automakers such as Audi, BMW, Mercedes, Ford, Volkswagen and Volvo already offer features for monitoring driver attention and detect drowsiness using driving inputs cameras and sensors. In precarious conditions, these built-in systems can alert the user and in some cases take remedial action. Attention assistance systems are slowly becoming mainstream now with several more OEMs announcing their plans to similar roll-out systems. The market for health monitoring system sensors is expected to proliferate in the coming years.

#### Geographical Analysis:

By Geography, the report segments the market as North America, South America, Europe, Asia-Pacific and Rest of the world. Europe has the largest market for Steering Sensors, as it is the leading importer of automotive products.

Several macroeconomic and microeconomic factors are creating huge impact in the Automotive Steering Sensors Market by tracking various influencers and understanding the flow of the market. This type of study is expected to steer out the market from any harm on the way to progress. Also, the close inspection of the market from several quarters are reflecting several demographic changes that can be assessed to find proper areas for exploration. The process is guided by a desire to maximize the profit. Updated with real-time data, this market can bring about changes really quick. This also ensures high potential of the market and inspires maximum output via optimal using of resources.

The growth of the Electric Power Steering Market is boosting the market for steering sensors. With the advent of electric power steering, there has been an exposure to steering technology which is much better than the conventional steering. So, electronic control over steering systems is expected to significantly impact the progress of the market owing to the increasing demand

from end users for improved efficiency, safety, and comfort.

However, the Automotive Steering Sensors Market is enjoying substantial benefits of having a blend of new entrants and existing market bigshots. This blend is making the market more competitive. In their strategic moves, they often include collaboration, merger, product launch, acquisition, innovation, and other methods. The report also keeps an eye on regional segmentation to gauge possible growth pockets that can be fully assessed before launching a substantial plan for growth.

Major Key Points of Global Automotive Steering Sensors Market

- Global Automotive Steering Sensors Market – Methodology and Scope
- Global Automotive Steering Sensors Market – Trends
- Global Automotive Steering Sensors Market – Industry Analysis
- Global Automotive Steering Sensors Market – By Type
- Global Automotive Steering Sensors Market – By Technology Type
- Global Automotive Steering Sensors Market – By Technology Type
- Global Automotive Steering Sensors Market – Competitive Landscape
- Global Automotive Steering Sensors Market – Company Profiles
- Global Automotive Steering Sensors Market – Appendix
