

Aircraft Ignition Systems Market 2019 Global Trends, Share, Growth, Analysis, Opportunities and Forecast To 2026

PUNE, MAHARASHTRA, INDIA, August 8, 2019 /EINPresswire.com/ -- Summary:

A new market study, titled "Discover [Global Aircraft Ignition Systems Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

Introduction

Global Aircraft Ignition Systems Market

The global Aircraft Ignition Systems Market is likely to exhibit steady growth over the forecast period, according to the latest report on Wise Guy Research (WGR). The market's major drivers and restraints are analyzed in the report, which provides readers with a clear picture of what's driving and what's holding back the Aircraft Ignition Systems Market. The historical trajectory is examined in the report in order to provide a basis for predictions regarding the market's growth rate over the forecast period. Happenings in the review period are examined carefully to explain their connection with the market's present state and future growth prospects.

Global aircraft ignition systems market is highly fragmented due to the presence of a considerable number of big and small industry players. Some of the key players include Aero Inc., Woodward, Transdigm, Meggitt, Unison, Electroair, Surefly, Sky Dynamics, and Air Power among others. Kelly Aerospace, one of the prominent players in the global aircraft ignition system market, is enhancing its market competitiveness through new acquisitions. For instance, in March 2018, Kelly Aerospace acquired 100% stake of Aerokool Aviation Corporation, an MRO and manufacturing centre.

The leading players operating in the Aircraft Ignition Systems Market are also studied in the report to provide readers with a comprehensive overview of the competitive landscape in the market. The major strategies used by leading players are studied in the report to provide readers with an idea of what works and what doesn't, in the Aircraft Ignition Systems Market. Individual players are analyzed in detail in the report in order to elaborate on their regional presence and product catalog, providing a clear overview of each major player operating in the Aircraft Ignition Systems Market.

Geographical Analysis:

Based on the region, the aircraft ignition system market is segmented into North America, Europe, Asia Pacific, and Rest of the World. North America is anticipated to hold the highest market share for aircraft ignition systems during the forecast period. Presence of several leading aircraft ignition system manufacturers such as Woodward, Unison, TransDigm, Air Power Inc., and Electroair in the North America region are driving the market for the aircraft ignition systems in recent years. Increasing air traffic in the region and increasing number of aircraft deliveries are also supporting the growth. The market in the Asia Pacific region is anticipated to be the fastest growing throughout the forecast period. The growth can be attributed to increase in urbanization, growing middle-class population, and increasing disposable income especially in India and China leading to a spike in air traffic which demand for new aircrafts. Thus, increasing aircrafts in the region focusing on fuel efficiency will drive the growth in advanced ignition systems in the coming years.

Global Aircraft Ignition System Market Segmentation

The aircraft ignition systems market has been segmented based on system type, component, and engine type. Based on the system type, aircraft ignition system market has been segmented into electronic and magneto ignition types. The magneto type ignition system is used on most reciprocating aircraft engines. The electronic ignition segment is anticipated to lead the aircraft ignition system market during the forecasted period owing to advancement in technological innovations and more focus towards reducing carbon emissions. Electric ignition systems are more reliable, and have a longer lifespan as compared to conventional ignition systems used in aircraft such as, Lycoming Piston Engine Solid State Ignition System, CH42PR20A. Based on the component type, the aircraft ignition market is segmented into igniters, ignition leads, exciters, spark plug and others. The spark plugs segment is anticipated to dominate the market during the forecasted period owing to factors such as superior insulation properties, high flexibility, and high heat-resistance. The market for ignition leads is also projected to grow at a significant CAGR due to its low resistance value, which allows superior conductivity, advanced insulating material, and exceptional long-life durability among others.

Global Aircraft Ignition System Market Dynamics

Factors contributing to the growth of the aircraft ignition system market is increasing adoption of electronic ignition systems and new technological advancements happening in the aircraft ignition systems. In addition, the growing demand for aircraft ignition system in the UAVs vehicle segment will further drive the market growth over the coming years. However, increasing environmental norms related to emissions is leading to a declining in the acceptance of the conventional ignition system in comparison with new electronic ignition systems which is restraining the growth of the aircraft ignition system market.

Solid industry-standard analysis tools such as SWOT analysis and Porter's Five Forces analysis are used to gauge the present condition in the Aircraft Ignition Systems Market. A detailed analysis of the market's likely growth trajectory over the forecast period is presented on the basis of this analysis, which includes historical information. A complete picture of the Aircraft Ignition Systems Market's movement through the recent past and likely movement in the coming years is provided in the report.

The regional segmentation is also discussed in the report, and detailed analyses are provided for the market's segment in each major region. The key regional markets are profiled to give players an idea of where each region is soaring and what needs attention in specific markets. Region-specific strategies and product formulations can be based on this detailed analysis, as the factors making the market tick in specific regions are analyzed in the report, leading to a comprehensive understanding of the market.
