Description

Global Automotive Carpeting and Roofing market is expected to grow from \$XX million in 2016 to reach \$XX million by 2023 with a CAGR of XX%. Growing vehicle production, increasing investments in automotive technologies, rising application of green technologies in automotive leather materials and technological advancements are the major factors propelling the market growth. However, huge capital requirement is hindering the market growth.

Based on Vehicles, the passenger vehicle segment is expected to witness huge demand in the market due to rising consumption of vehicles such as cars and trucks by the vast population across the world. Automation of roofing and carpet materials in passenger vehicles have created a huge demand due to its fringe benefits such as light weight fabrics, high resistance to absorb dirt and water, high durability, tensile strength and properties to withstand high exposure to sunlight and protecting the damage caused to the carpets, roofs and seat covers due to UV radiations. In addition, the materials are used for controlling the noise vibration in the vehicles. Automation in passenger vehicles today not only covers isolation and safety aspects but also provide comfort and style. Nowadays majority of the population are getting attracted to the various appearances of the cars and other vehicles which is creating a huge scope for textiles application in automation.
