

The simpler the better - NoxPlayer's 4th Anniversary

BEIJING, HAI DIAN, CHINA, August 16, 2019 /EINPresswire.com/ -- August 12th 2015, the world first met [NoxPlayer](#). It was the blowout time of Android emulators and NoxPlayer was one of them. Truth to be told, in the last four years, every single day was a battle. We were challenged and doubted. We have made it through adversities and setbacks, but we were never defeated. All because we always bear one central tenet in mind for NoxPlayer—Less is more.

It means that NoxPlayer always provides the most primitive Android environment with the best possible performance for our users. It means that NoxPlayer does not dazzle users with impractical functions, but iterates based on users actual demands. It means that even for a completely green hand, NoxPlayer can be easily operated without any difficulty. That is how NoxPlayer has developed from ordinary to extraordinary.

NoxPlayer provides the widest range of compatibility to run 99.3% of all 2.7 million mobile games and trending applications. By March 2018, NoxPlayer users officially exceeded 150 million. Furthermore, in July 2019, we have officially become a Facebook China Export Partner. NoxPlayer and Facebook will develop a deeper and more extensive partnership in the future.

As a technology-based product, NoxPlayer always stays at the forefront of technical innovation. In April 2019, NoxPlayer became the first Android Emulator that carries OpenGL Plus—An advanced graphic rendering mode that allows hardcore games to run smoother. In the second half of 2019, NoxPlayer will release a beta version to fully support all 64-bit games. Apart from that, NoxPlayer will also allow users to run Android 9 on PC anytime soon. You can switch to different Android versions with one simple click.

NoxPlayer will attend the 2019 Tokyo Game Show (TGS) from 12th to 15th September. We would like to invite all gamers to come visit us!

Moreover, on our 4th Anniversary, NoxPlayer will host a huge giveaway from August 10th to 13th on a global scale. Stay tuned for our Facebook and other social platforms for further information.

Finally, we would like to show our deepest gratitude to all the noxers whether you are new to us or a "veteran". We will be honored to have you with us for another 4 years!

The image shows a screenshot of the NoxPlayer interface. On the left, there are four game thumbnails: 'Sword Stabs', 'Sword Stabs', 'Sword Stabs', and 'Sword Stabs'. On the right, there is a dark blue panel with white text. The text reads: 'NoxPlayer bignox.com', 'Android 9 will be supported soon', 'The upcoming beta version will fully support all 64-bit games', and 'The first Android emulator to develop and carry OpenGL+ that allows hardcore games to run smoother'. Below the screenshot, the text reads: 'NoxPlayer, the perfect Android emulator for PC and MAC'.
