

Improved Efficiency and Benefits to Drive Global Hyper-Converged Infrastructure Market 2019-2024

Wiseguyreports.Com Adds "Hyper-Converged Infrastructure (HCI) - Global Market Outlook (2016-2022)" To Its Research Database

PUNE, MAHARASHTRA, INDIA, August 16, 2019 /EINPresswire.com/ -- [Hyper-Converged Infrastructure \(HCI\) Industry](#)

Description

The worldwide hyper-converged infrastructure market has reached greater heights in recent years with the enormous sales of converged systems sales. The hyper-converged infrastructure solutions are increasing with the capability of operating business-critical workloads along with reducing data center complexity. The market is touted to expand its share across the world by gaining substantial factors directly influencing the market as well as the industry.

It has been observed that data center outages in organizations might result in substantial losses to the business. In order to ensure business continuity, disaster recovery is a typical part of a broader strategy to continue the business. In such cases, organizations are increasingly making a switch from the traditional version of backups to a single VM or application. Hence, now the organizations are deploying hyper-converged infrastructure solutions for immediate action towards back-up data, recovery, and disaster recovery applications that are important. The solution, thus, brings up all the essential business services and allow business operations to continue at the same pace. Therefore, these advantages of hyper-converged infrastructure have excelled the market growth in the current time, and it is anticipated to expand rapidly in the coming years.

In the market study of hyper-converged infrastructure, some of the top market players such as VMware, Nutanix, Dell EMC, and HPE have marked their global presence as they kept investing in the market share and made it reach to the optimum level. Due to such investment, substantial research and innovation have resulted in hyper-converged infrastructure market to grow over the years by improving the operational efficiency of systems and many more. These development, improved scalability, and data center consolidation have majorly prompted the global hyper-converged infrastructure market to surge remarkably and would continue growing over the forecast period.

With the rising development of hyper-converged infrastructure solutions among the businesses, there has been a considerable rise in the awareness of data management at a reduced cost of ownership. This is enabling the global hyper converged infrastructure market to expand exponentially in the years to come. The study also accumulates the information that the global hyper converged infrastructure market has spanned across North America majorly, then the Asia Pacific and Europe with the increasing hyper converged infrastructure applications in

businesses. As these regions are developing through businesses (large or small), it becomes essential for them to have hyper converged infrastructure solution ready in one take.

Various industry verticals like electrical industry, are also implementing hyper converged infrastructure solution for their market expansion. Thus, these factors together are contributing to the global hyper converged infrastructure share to increase by 2027.

Table of Content

1 Executive Summary

2 Preface

3 Market Trend Analysis

4 Porters Five Force Analysis

5 Global Hyper-Converged Infrastructure (HCI) Market, By Application

6 Global Hyper-Converged Infrastructure (HCI) Market, By End User

7 Global Hyper-Converged Infrastructure (HCI) Market, By Hypervisor

8 Global Hyper-Converged Infrastructure (HCI) Market, By Geography

9 Key Developments

10 Company Profiling

10.1 Hewlett Packard Enterprise Company

10.2 Cisco Systems, Inc.

10.3 Maxta Inc.

10.4 Scale Computing

10.5 Nutanix Inc.

10.6 Gridstore, Inc.

10.7 Nimboxx Inc.

10.8 Pivot3

10.9 Simplivity Corporation

10.10 Vmware Inc.

10.11 Atlantis Computing

10.12 Stratoscale

10.13 Huawei

10.14 Fujitsu Ltd.

10.15 Dell Inc.
