Air Pollution Mask market is highly consolidated among few key players such as Vogmask, 3M, Honeywell, Respro and others. The competition in the industry is increasing with number of players developing new innovations. For instance, Totobobo has introduced UNIFit system, a closed mask to match flexible fitting and sealing based on the face shape to prevent leakage. Several macroeconomic and microeconomic factors have been taken into consideration while assessing the trigger points that could make or break the Air Pollution Mask Marke. These pointers have been studied well against their demographic background to gauge the real scenario. Such an extensive study is needed to get a good grasp over regional markets and understand the growth pockets that can help in maximize the potential and allow the market in garnering prospects from different quarters.

Global Air Pollution Mask market share, By region, 2017

Region Share

Americas 33%

Asia Pacific 26%

Europe 29%

Rest of the world 12%

Global Air Pollution Mask market - Segment Analysis:

Air Pollution Mask market is segmented based on filter type and application type.

By filter type the market is segmented as N-type, P-type and R-type. N-type filters are accounted for the major market share in the global air pollution mask market, as they are capable of filtering pollution, air particulate matter and available at cheaper prices. N95 and N99 are the most common type of masks in the market that they are capable of filtering 95% and 99% of pollutant particulate matter in the air.

By application the market is segmented as personal and industrial. Personal application of air pollution masks is expected to have major share and strong growth in the global air pollution mask market over the forecast period to 2025, due to increasing pollution levels and associated

concerns in global nations. Based on a study conducted by National Academy of Sciences, in China, increased exposure to air pollution is linked to cognitive decline and the risks are high among aged population.

Global Air Pollution Mask diagnostic market - Geographical analysis:

By geography the market is segmented in to Americas, Asia pacific and Europe and rest of world. Americas accounted for the major share in the market with increasing pollution levels in the region. Asia Pacific is expected to post strong growth in the coming years with increasing pollution levels in developing nations such as India, China and others. As of 2016, India death rate due to air pollution is around 100 to 150 per 100,000 population.

The Air Pollution Mask Market is a fragmented one. The presence of the existing market titans and the constant influx of the new entrants are expected to make the market a highly competitive one. These companies are expected to launch their own tactical moves to get the maximum privilege. In the process, they would also assist the global market in its expansion. These strategies often include merger, acquisition, product launch, innovation, and other methods. The report has charted the current market trends as well to make a better predictive analysis. Along with these, geographic analysis of the market, to understand the socio-economic factors at play, is playing a pivotal role.
