The report also includes an in-detailed information concerning some of the major driving factors, challenges, and potential opportunities that lies in the market and which can have an influential role on the overall growth of the market

In the past, IT leaders used to view the avoidance and decrease in costs as principal benefits of cloud-based flexible consumption. However, in the past couple of years, increased business agility and the democratization of innovation have been the driving forces in the ICT industry. These two factors have resulted in the magnification of the cloud's value proposition, i.e. XaaS solutions. This everything-as-a-service (XaaS) solutions have enabled faster and easier experimentation and innovation, heightening the speed of customer experience enhancement.

XaaS is projected to witness accelerated adoption in the coming years. The adoption of the same is anticipated to enable small-scale enterprises to function efficiently with limited resources, further driving the growth of the sector. Different tasks that can be performed by the employment of XaaS include data management, networking, operations management, and electronic communication.

Moreover, there is a rise in the affordability of high-end computers and infrastructure required to introduce the latest ICT solutions in enterprises. This is estimated to push sizeable growth in the ICT sector, as it enables the utilization of these solutions for private purposes as well. Owing to the fast-paced penetration of social media, the demand for the latest ICT solutions has gone off the charts. A mounting demand, production, and adoption of latest and cost-effective gadgets are noted in the current markets, thanks to the younger population magnetizing towards latest technologies.
