Artificial Intelligence Is Gaining Popularity In The SaaS Market. Oracle, A Big Player In SaaS Market Uses AI And Machine Learning To Overtake Salesforce In SaaS."

Abdul Wasay

LONDON, GREATER LONDON, UK, August 22, 2019 /EINPresswire.com/ -- The global software as a service (saas) market was valued at about \$134.44 billion in 2018 and is expected to grow to \$220.21 billion at a CAGR of 13.1% through 2022. The software as a service market has been geographically segmented into North America, Western Europe, Asia-Pacific, Eastern Europe, South America and Middle East & Africa. The North American market is the largest market for software as a service and is expected to continue to be the largest market during the forecast period.

The [SaaS market](#) consists of sales of cloud based software services. SaaS is a software solution which can be purchased on a subscription or pay per use basis to use an application for organizational purposes and customers can access this application over internet, mainly through a web browser. All the applications data and software are located in the services provider's data center. SaaS allows an organization to run an application at minimal upfront cost and speeds up overall functionality of the organization.

Rapid changes in business dynamics in the market are expected to benefit the software as a service (SaaS) market in the forecast period as cloud-based solutions support business operations in changing conditions. Dynamic market conditions include economic uncertainty, competitive rivalry and the increasing adoption of mobile, changing regulations, internet usage and applications. These conditions along with the increasing number of infrastructures and established networks have forced organizations to pursue scalable and flexible solutions such as SaaS and other cloud enabled services to run and supervise their operations in a cost-effective and efficient way. These factors have also compelled companies to outsource applications and prefer cloud computing services like SaaS to reduce their cost burden on infrastructure.
