Artificial Intelligence (AI) in Food and Beverage Market 2019

Artificial Intelligence (AI) in Food and Beverage Market - 2019-2025

Report Summary:

AI technologies have been developed over the years, to assist humans in deliberating, deducing, analyzing, and inventing new technologies that can help end-users. AI embodies multiple disciplines that allow computers to perform functions associated with human intelligence such as reasoning, problem-solving, and learning. Manufacturers in the F&B industry can experience several benefits by deploying AI technology in the manufacturing sector.

During 2017, the transportation and logistics segment accounted for the major shares of the AI market in F&B industry. Factors such as the increased use of AI algorithms to ensure automatic procurement and creation of purchase and work orders and the rising need to keep up their procedures and processes will contribute to the growth of this industry segment in the coming years.
