

Global Lotion & Moisturizer Market Share, Supply, Analysis and Forecast to 2024

WiseGuyReports have announced the addition of a new report titled "2019 Global and Regional Lotion & Moisturizer Market Research Report Forecast 2025".

PUNE , MAHARASHTRA, INDIA, August 23, 2019 /EINPresswire.com/ -- Report Description:

A lotion and a moisturizer are both skincare products used for hydrating and healing the skin. A lotion and a moisturizer differ in their composition and their consistencies but the main purpose for using both is the same, i.e., rejuvenation of the skin. Nowadays, with people being more conscious about skincare and beauty, there is a high probability of an increase in the demand for lotions and moisturizers in the market.

Moisturizers come in many forms. Of these, lotions are the lightest with the greatest water content and the thinnest consistency. These are easily absorbed into the skin and feel lighter than the other forms. Most facial moisturizers come in this form. Creams and ointments are other popular forms in which moisturizers come. Moisturizers are good for the skin as they help the skin in retaining moisture and prevent it from being dry and scaly.
