and region. Based on type, the global human resource (HR) software market is segmented into cloud and on-premise. Based on application, the global human resource (HR) software market is segmented into private enterprise and public enterprise.

Detailed Regional Analysis

The global human resource (HR) software market is regionally segmented into United States, Europe, China, Japan, India, Southeast Asia, and Central & South America. Among these regions, the United States is expected to dominate the global human resource (HR) software market over the assessment period. This can be accredited to the fast-paced adoption of cloud-based human resource software in enterprises to conduct efficient HR practices.

Regions that are a part of the continents of Asia and Pacific such as India, China, Japan, and Southeast Asia are anticipated to witness the fastest growth, as compared to other regions of the world. This can be attributed to the improvements in the IT infrastructure. Further, increasing deployment of mobile phones in these regions is expected to foster higher adoption of HR software. A shift of small, medium, as well as, large scale enterprises on cloud are expected to push sizeable growth in the regional human resource (HR) software market.
