Analysis of Global and regional Game Engines market

Europe and the United States have been the world's two biggest consumer nations of Game Engines over the previous few years and will continue to grow in the coming years. The European and US markets respectively accounted for around 29 percent of the worldwide market in 2016, while Japan and Korea accounted for around 13 percent, followed by China with a share of around 4 percent as Chinese game developers generally use free game engines.

In subsequent years, particularly in China, the Asia-Pacific will also be occupying rapidly increasing areas in India and Southeast Asia for more market share. North America will still play an important role, especially the United States, which cannot be ignored. Any modifications from the U.S. could influence Game Engines growth trend.

USA's market respectively took up about 29% the global market in 2016, while Japan and Korea are about 13%, and China is followed with the share about 4% as Chinese game developers usually use free game engines. USA, Germany, China, UK and Japan are now the key developers of Game Engines.
