

# Nodular Cast Iron Pipe Market 2019 Industry Trends, Production, Sales, Supply, Demand, Analysis & Forecast to 2025

*This report covers market characteristics, size and growth, segmentation, regional breakdowns, competitive landscape, market shares, trends and strategies*

PUNE, INDIA, September 5, 2019 /EINPresswire.com/ -- Overview:

A Nodular Cast Iron Pipe is made up of Nodular cast Iron or spheroidal graphite cast iron. In Nodular Cast Iron Pipe, the graphite is in the form of nodules instead of flakes as found in normal cast iron pipe. The rounded nodules prevent the creation of cracks in the pipe, thus, provides better ductility. The formation of nodules or spheroids takes place when the graphite gets separated from the molten iron during solidification and the additives accelerate the graphite to take spheroidal shape. Nodular Cast Iron Pipe has excellent toughness and higher elongation. It has been designed as a high strength pipe, which gives excellent performance and is eventually, has the potential to reject the pipe made from forged steel. Nodular Cast Iron Pipe has become very popular in almost all major industrial sectors. It has improved ductility, higher strength, wear resistance, toughness, resistance to higher thermal and mechanical shock, different temperature resistance, corrosion resistance, and dimensional stability. The tensile strength of it is higher than any other type of cast iron pipe.

Several factors are expected to impress the global Nodular Cast Iron Pipe market in the coming years. Its features like superior quality, excellent mechanical properties, unmatched corrosion protection, and better sealing performance make it perfect for quality assured water supply. Nodular Cast Iron Pipe is cost-effective and offers better performance. It is very strong. It has excellent wear resistance due to the presence of graphite in the iron. As it has reduced vibration and sound, they are used in large machines. The global nodular cast iron pipe market can gain thrust from water management systems as well.

Competitors:

The key players operating in the Nodular Cast Iron Pipe market are Saint-Gobain, AMERICAN Cast Iron Pipe, SUNS, Kubota, US Pipe, Jindal SAW, Electro-steel Steels, Mcwane, Kurimoto, Xinxing Ductile Iron Pipes, Shandong Ductile Pipes, Shanxi Guanghua, Benxi Beitai, Jiangsu Yongyi.

Segmentation:

The global Nodular Cast Iron Pipe can be segmented into product type and application. This would provide substantial insight regarding the market

Based on the type, the nodular cast iron pipe market can be segmented into DN 80mm – 300mm, DN 350mm – 1000mm, DN 1100mm – 1200mm, DN 1400mm – 2000mm and others.

Based on the application, the nodular cast iron pipe market can be segmented into Water supply, Gas or oil supply, Mining and other.

#### Regional Analysis:

In terms of region, North America and Europe Nodular Cast Iron Pipe markets are anticipated to expand significantly. It has a huge demand for Nodular Cast Iron Pipe due to its long-lasting and durability.

The Nodular Cast Iron Pipe market of North America and Europe will drive the market share. Both these regions have strong expenditure capabilities. The demand for Nodular Cast Iron Pipe is increasing because of strong support and investment by Governments across the countries.

In the Asia Pacific and the MEA market, Nodular Cast Iron Pipe market will expand at a rapid pace. It is expected that during the forecast period primarily because of rising demand in developing countries the regional market will show outstanding performance.

Asia-Pacific is forecasted to do well in the market by revamping its existing model of Industries. Within the forecast period, it will show promising potential in the market.
