

Food Cold Chain Market 2019: Global Trends, Market Share, Industry Size, Growth, Opportunities, Forecast to 2025

This report covers market characteristics, size and growth, segmentation, regional breakdowns, competitive landscape, market shares, trends and strategies

PUNE, INDIA, September 5, 2019 /EINPresswire.com/ -- Food Cold Chain supply indicates a series of transactions to keep products such as raw materials, finished food products, and other goods at low temperature to maintain its quality and purity. It is a supply chain based on cold storage. Growing technological advancement in warehouse management and refrigerated transportation, the market is likely to notice growth during the forecast period, i.e., 2018-2025. Proper warehouse management also contributes to growth in the cold chain market. Incentives provided by the government to the market players add to the growth of the industry. With rapid urbanization and fast lifestyle, people in developed countries prefer ready to make food many a time which is usually frozen in nature. Various instant food products are also placed in cold storage. Hence, the busy lifestyles can also be considered as a factor which contributes to the growth of this industry. Increase in demand for perishable items starting from milk products spurs the demand and supply chain in the market.

Regional Producers

Europe, Asia Pacific, North America, Africa, the Middle East, and South America are the major producers and market contributors to the Food cold chain market.

Segments

The Food Cold chain market can be divided into segments depending on the products it caters its services to such as food, beverages, and health care or pharmaceutical products. Products such as Food, Fruits, Fruit pulp, medicines, Seafood, dairy products, bakery items add to the list.

Growth Indicators

Considering the market trends, the global food cold chain market was valued at 167.99 billion USD in 2018, and it is expected to rise consistently at a CAGR of 15.1% from 2018 to 2025. Growing infrastructure for refrigeration and an increase in investors in this field has anticipated growth. Another reason for the rapid growth of the cold chain industry is the utility of frozen food products in restaurants and hotels wherein all seasonal food is required across the year to serve the consumers. Globally the supply chain has led to increase in sales as the cold storage food is available in hypermarkets, supermarkets as well as retail stores. Government is also a major contributor when it comes to rising in the sale of cold storage food products as import duties have been made free to increase trade of perishable food and therefore the countries into export of cold storage items will be noticed to have increased their sales.
