LONDON, GREATER LONDON, UK, September 7, 2019 /EINPresswire.com/ -- According to the global rail industry outlook, the [rail freight market](#) expected to reach a value of nearly \$159.06 billion by 2022, significantly growing at a CAGR of 14.6% during the forecast period. The growth in the rail freight market is due to developing infrastructure and adoption of advanced technologies. However, the market for rail freight is expected to face certain restraints from several factors such as restrictions imposed on foreign entry and other barriers.

The rail freight transportation market consists of sales of rail freight transportation services by entities (organizations, sole traders and partnerships) that provide the carriage of goods from a point of loading, or goods station, to a point of unloading, again a station capable of handling the loading and unloading of the goods carried. These goods are generally heavy in bulk and of low value in relation to their bulk. Examples include coal, building materials, iron and steel.
