Officially went Live on April 26th. CBDR has since become a staple in the CBD E-commerce battlefield with its strict mission. Educating CBD Consumers on the benefits of using Highly Accredited CBD Brands that follow strict guidelines and requirements to meet Matthew's high expectations; this ensures that CBDResellers' Customers receive not only highly accredited, 3rd party Cloud-Direct-labs that are validated and the most well-known CBD brands and products on the market at the best possible pricing. Every product or brand goes through rigorous testing to ensure it is a product that has been fully vetted for their customers. All lab reports and certificates of analysis (COA) are updated with every new batch vendors take in to remain compliant with CBDR's high standards of providing customers with the best CBD on the market. This not only includes potency testing, but we require all brands to provide a full workup including pesticides, heavy metals, and biological processing, so consumers know exactly what is in the CBD they purchase.

As Matthew explained, "Due to the amount of brands on the market that are unacceptable, we use a custom algorithm I created many years ago to narrow down our search to five CBD brands that have the potential of becoming apart of CBDResellers. From there, we follow a process that I created that performs various checks including references, direct customer feedback and validating the Labs"

(Author Jonathan Reilly) How did you choose Arise Bioscience's Brands?

"Due to their latest brand, Original Hemp's quality, their lab testing process, display & packaging and ultimately concluding their company's commitment to high standards, made the decision to finalize on-boarding simple. These are the types of companies that we look to build long term relationships with. Although they are hard to find, when we do find a company such as Arise Bioscience and find out that we not only share the same core values, however, we also share the same mission; educating consumers on how important it is to know what you're putting in your body. It's incredibly rewarding to know that we're not alone. There are great companies that do truly care about their consumers and I couldn't be more excited to offer our customers another brand that we stand behind. We plan to onboard their 4 other brands as well and I'm confident that our customers will be very satisfied"
