Factors affecting the growth prospects

There is a slew of factors that affect the growth prospects of the food and beverages industry. The robust supply chain, coupled with advanced technologies, has been a major driving force. One particular section that has been growing lately is the organic food industry. More and more

people are becoming aware of their health and hence are in search of organic products which are free from any kind of pesticide and inorganic fertilizers. The governments seem to be pushing the reforms as the soil starts losing its fertility after a few years of farming. However, the limited land space has been a major limiting factor. The global hunger index is rising fast, and farmers are running out of space to grow more products on existing land. To combat the growing concern, scientists have come up with vertical farming methods which are highly efficient in comparison to the other farming methods. On the other side, the beverage section is enjoying great demand. The rising income of the millennials has helped the industry flourish well, even in the worst economic conditions.

Key Geographies

The developed nations with better per capita income has been the major market for the food and beverages industry. The millennial also has a positive impact on the industry. The United States has emerged out to be the clear winner, while Europe comes next. The disposal income and the love for different cuisines have helped the market flourish in the region. The Asia Pacific region has also emerged out to be a major market thanks to the colossal population in the region. China and India have been the major market, and the market is driven by the love for fast foods in the region.
