The following manufacturers are covered in this report, with sales, revenue, market share for each company:

Zilong
Gillo
Jomoo
Losp
Tai Tao
Kohler
Giessdorf

The report explores different factors attributing to fast-paced growth in the global Intelligent Urinal Industry including a detailed study of several volume trends, pricing history, and the value of the product/ service. Some noteworthy factors studied in the market research report include the impact of snowballing population growth, proliferation witnessed in technological innovation, as well as, demand and supply dynamics experienced by the Intelligent Urinal market. Apart from this, it includes the introduction of government policies and the competitive landscape of the Intelligent Urinal market during the review period.

For an accurate determination of the Intelligent Urinal market’s potential, the market has been analyzed using Porter’s Five Force Model for the forecast period of 2019-2025. Additionally, a detailed SWOT analysis has been conducted to aid the reader’s decision making with regards to Intelligent Urinal Industry.

Speaking about the influence of technology in the sector, one cannot undermine or ignore the impact blockchain technology potentially holds. There has been a growing focus in the industry over the need to involve patients actively in their diagnoses. Blockchain can help bring a level of transparency to this. Medicalchain, a blockchain-based EHR solution provider, is planning to change the way people access their medical records. They plan to use blockchain technology so as to enable patients to view and share their data with clinicians as per their need and convenience.

Add to this, consumers are increasingly getting involved in the management of their health. This is prompting consumer genetics and research organizations to increase. People are more and more inclined to know about their genetic makeup. Genome Sequencing is slated to hold massive potential in the coming years. One can use the technology to gain insightful information about drug sensitivity, family history of diseases, multifactorial or monogenic medical conditions. Furthermore, a number of fields are reportedly seen leveraging the advantages the technology boasts, this includes dietetics, nutrigenomics, and others. 23andMe, a global leader in personal genomics and biotech, has over the years become the biggest consumer-based organization. Athletigen Technology Inc., a Nova Scotia-based performance organization, is operating on the cross-field of genomics and sports to improve the performance, health, and safety level of athletes or sportsmen. This is a key indication of how popular genomics is becoming and how it is positively influencing the healthcare sector.
