WiseGuyReports.com “Ghana - Telecoms, Mobile and Broadband - Statistics and Analyses” report has been added to its Research Database.

Scope of the Report:

[Vodafone Ghana launches LTE services following spectrum auction](#)

Ghana’s telecom market has benefited from the privatisation of the incumbent telco Ghana Telecom and its rebranding as Vodafone Ghana. The company is the principal fixed-line provider and also the third largest player in the mobile services sector, after MTN and the recently merged AirtelTigo. It remains a key investor in telecom infrastructure, supported by various government-funded schemes to extend the reach of telecom services nationally. Recent upgrades have included an extension to the Eastern Corridor as well as a new cable connecting to Burkina Faso operated by Vodafone Wholesale.

Free Sample Report @ <https://www.wiseguyreports.com/sample-request/3900504-ghana-telecoms-mobile-and-broadband-statistics-and-analyses>

Many unique challenges and opportunities exist in the Ghanaian telecoms market. It explores Ghana’s telecoms sector in further detail throughout this report along with analyses of the market, key industry statistics, and information on the key developments and major players. The launch of LTE services by Vodafone Ghana in March 2019 and the extension of LTE-A services by MTN Ghana, have greatly improved the quality of mobile data services for end-users. This has been reflected in a number of areas, including the strong m-commerce and m-banking sectors. The vibrant mobile market has retained steady subscriber growth.

Ghana has a highly competitive internet market, and though there is a large number of licensed ISPs most subscribers are customers of only a few operators. In common with other markets in the region, the vast majority of internet accesses are via mobile networks.
