Intetics CIO Passed CIPT Certification by IAPP

Intetics Chief Information & Data Protection Officer, Sergei Tchernyshenko, has passed CIPT exam and became IAPP Certified professional.

NAPLES, UNITED STATES, September 11, 2019 /EINPresswire.com/ -- We are honored to announce that Intetics Chief Information & Data Protection Officer, Sergei Tchernyshenko, has passed CIPT exam and became IAPP Certified professional.

"

> The IAPP certifications are becoming de facto requirement to do advisory work on the GDPR. These certifications in data protection have plugged thousands of professionals into the information economy."
>
> *Sergei Tchernyshenko*

The CIPT is the first and only certification of its kind worldwide. It was launched by the IAPP in 2014 to meet the growing need that only tech pros can fill—securing data privacy at all stages of IT product and service lifecycles. The CIPT credential shows that IT specialist got the knowledge to build the company's privacy structures from the ground up.

The CIPT certification confirms personal data protection technology expertise, staying in compliance with GDPR and other regulations in data privacy. Getting this certification is becoming a default requirement for any professional advising in the field of EU data protection and privacy regulation. The CIPT body of knowledge outlines all the concepts and topics that the specialist needs to know to become certified. During the educational process, the specialists learn:

Critical privacy concepts and practices that impact IT
Consumer privacy expectations and responsibility
How to bake privacy into early stages of IT products and services for cost control, accuracy and speed-to-market
How to establish privacy practices for data collection and transfer
How to preempt privacy issues on the Internet of Things
How to factor privacy into data classification and emerging tech such as cloud computing, facial recognition and surveillance
How to communicate privacy issues with partners such as management, development, marketing and legal.

"The IAPP certifications are becoming de facto requirement to do advisory work on the GDPR. These certifications in data protection have plugged thousands of professionals into the information economy," says Sergei Tchernyshenko.

As data privacy is highly important in the company's cybersecurity, Intetics pays close attention to acquiring InfoSec standards. Passing CIPT credential and training products deliver immense value by giving the skills to identify solutions that implement privacy principles in compliance with sweeping new data protection regulations.

About Intetics

Intetics is a leading global technology company focused on custom software application development, creation and operation of distributed professional teams, software product quality

assessment, and "all-things-digital" solutions built with SMAC, RPA, AI/ML, IoT, blockchain, and GIS/UAV/LBS technologies.
