“

Our prediction is that approximately 25,000 past and present employees in the asbestos industry have died or will eventually die of asbestos-related disease.”

Asbestos Textile Institute in a 1973 presentation

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2019 were exposed decades ago.

For the best possible medical treatment for mesothelioma and asbestos-related lung cancer, call (888) 891-2200 so a member of The Steinberg Law Group can determine which hospital/doctor in our network is most convenient for you.

States with the highest incidence of mesothelioma include Oregon, Washington, Louisiana, Minnesota, North Dakota, Michigan, Illinois, Virginia, West Virginia, Ohio, Pennsylvania, New Jersey, Maryland, Massachusetts, Maine and Connecticut. For more information about

Welders, pipefitters, electricians and mechanics are among the top professions where asbestos exposure was prevalent.
