Abdul Wasay

LONDON, GREATER LONDON, UK, September 12, 2019 /EINPresswire.com/ -- The [diamond mining market](#) expected to reach a value of nearly \$577.39 billion by 2022, significantly growing at a CAGR of 5.3% during the forecast period. The growth in the diamond mining market is due to increasing population in developing countries such as China and India owing to rise in disposable income, increased demand and availability of credit. However, the market for diamond mining is expected to face certain restraints from several factors such as interest rate increases, workforce issues and safety.

The diamond mining market consists of sales of diamonds by entities (organizations, sole traders and partnerships) that mine diamonds of different carats. Industrial diamonds are mostly used in cutting, grinding, drilling, and polishing procedures.
