PUNE, MAHARASHTRA, INDIA, September 13, 2019 /EINPresswire.com/ -- Summary:

A new market study, titled "Discover [Global Organic Fertilizers Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

Introduction

The Wise guy report provides the evaluation of Global Organic Fertilizers Market - 2018 – 2025 analysis. Organic fertilizers are derived or made from human waste, animal waste or vegetable matter. According to the report the market for organic fertilizers is estimated at USD 6.30 billion in 2017, reaching USD 11.15 million by 2022, at a CAGR of 12.08 percent over the forecast period.

Animal segment dominates the global Organic Fertilizers owing the advanced nutritional content of animal-based organic fertilizers, which are more beneficial for crops. Plant raw material market will grow by availability of major potassium and silica contents in plants and these Potassium and silica help to improve the resistance of crops to disease and lodging.

The Global Organic Fertilizers Market is expected to grow with a significant rate during the forecast period, 2018-2025, owing to government and non-profit organization's initiatives to promote and support natural based farming practices. Moreover, organic fertilizers break down according to nature's rules, so they may not release nutrients as soon as possible. As a result, the market growth is hampered due to the decline in consumer interest. The report provides the information of product application of market, Geographical Analysis, product type of market.
