PUNE, INDIA, September 13, 2019 /EINPresswire.com/ --

[Lancet Industry 2019](#)

Description:-

For diabetes/glucose test, tests in infants, heel-stick screening tests, as well as for scarred emergency patients or severely burned patients, Lancets are being used. The risk associated with blood transfusion is expected to hinder the market growth during the forecast period. The factors striving the market growth include rising incidence rate of contagious and non-contagious diseases, increasing prevalence of diabetes, and rising inclination towards home care and home diagnostics.

One of the main functional ranges of lancets is to monitor diabetes in the diabetic population. 9.4% of the US population are diabetic patients according to the Centers for Disease Control and Prevention (CDC). The demand for lancets is predictable to be huge with the increasing incidence of diabetes, thus resulting in the cumulative demand for devices and products to monitor and control diabetes, ultimately leading to growing usage of lancets.
