Increasing end-use applications for this market and growing demand for Collagen from the cosmetic industry have been the key market drivers. Also, the market size of global native collagen will get benefit from the increased adoption of collagen-based products as they feature better characteristics such as gelling, emulsification, and binding of food products in which they are used.

The health benefit offered by native collagen is also viewed as a prominent market driver. These products are useful in bone grafting, tissue engineering, and dental surgeries as well thus pushing forward the market size greatly.

Healthcare sector is expected to emerge as a major application segment in the collagen market. In terms of volume, the global native collagen market for healthcare is expected to reach 622.2 kilotons by the end of 2025.
