Machine learning and artificial intelligence are adding a fillip to the information and telecommunication technology growth. It has bought a revolution in methods of communication. Today, Chabot's are designed to answer calls and revert telephonic message. The exchange of humongous information over telecommunication requires security assurance due to the increase in cyber-thefts. Block chain technologies deployed in the information and telecommunication technology is taking care of its cyber security. Voice interaction is being widely accepted in several organizations. Applications like voice recognition, voice shopping, and virtual assistance are intensifying the voice interaction experience for customers.
