In modern healthcare, technology is playing a crucial role. Rapid adoption of advanced technologies such as big data, machine learning, artificial intelligence among others is revolutionizing the way healthcare organizations operate. This trend is expected to continue in the next decade and become prominent.

The healthcare companies find themselves at juncture where they are evermore closer to becoming a technology company. The healthcare sector is witnessing a higher inflow of companies active in converged industries. This in turn is opening new windows of opportunity for market players.

The healthcare sector is also witnessing a higher number of collaborations and partnerships with technology companies. Many of these partnerships are focused on developing sustainable blocks for quality-centric, affordable and easily accessible healthcare services. In addition, increased focus on preventive care is creating new growth opportunities for market players.
