In modern healthcare, technology is playing a crucial role. Rapid adoption of advanced technologies such as big data, machine learning, artificial intelligence among others is revolutionizing the way healthcare organizations operate. This trend is expected to continue in the next decade and become prominent.

The healthcare companies find themselves at juncture where they are evermore closer to becoming a technology company. The healthcare sector is witnessing a higher inflow of companies active in converged industries. This in turn is opening new windows of opportunity for market players.

The construction sector is being disrupted by the wave of novel technologies. Technology is expected to remain a major area of focus for market players. Investments in smart cities are channelized from both public and private bodies. Such factors are supporting the market growth. In addition, macro and micro economic factors such increased per-capita income, industrial growth and urbanization are making a deep impact on the industry trends. Emergence of new consumer markets is prompting companies to boost offshore operation and expand territories. However, price fluctuation of material prices may have a severe impact on the market.
