

THE BAHAMAS NEEDS OUR SUPPORT

Over 90% of The Bahamas unaffected by Hurricane Dorian

NEW YORK, NEW YORK, UNITED STATES, September 18, 2019 /EINPresswire.com/ -- Earlier this month on the 1st September, the Northwestern area of The Bahamas including both the Abaco Islands and Grand Bahama Island were severely hit by Hurricane Dorian. The effects of the hurricane were devastating. Winds as high as 185 miles per hour or 295 kilometers per hour have been reported in the area. Also, many thousands of people lost their homes.

But what the media failed to state is just how many of the 700 islands in the Bahamas were unaffected and are in serious need of support.

The Bahamas Tourism Minister Dionisio D'Aguilar has appealed to the world to help the region get back on its feet. He has implored travelers to continue to visit the hundreds of stunning Bahamas islands that were not affected by Hurricane Dorian.

All the airports throughout the Bahamas except for Abaco and Grand Bahama are open for commercial and private aircraft. Equally, all the islands south of the Abacos and Grand Bahama island are also totally unaffected and are as beautiful as ever.

“

We are determined to drive as much business to The Bahamas in the next 12 months to both support the economy and in turn help the affected islands”

The Bahamas comprises of over 700 islands. The islands have their location over a massive 100,000 square miles. There are more than 400,000 permanent residents on the islands and tourism is the number one employer. The distance from the most northerly point of the Bahamas to the most Southerly point is over 600 kilometers. Unfortunately, the coverage of Dorian did not point this fact out, and as a result, people around the world assume that the hurricane destroyed the whole region. Potential clients should understand the geography and huge

distances between islands so that they feel safe and happy to take a vacation to the Bahamas in the next 12 months.

Many people are wondering what they can do to help the islands following the terrible

destruction that has taken place.
There are several ways we can help

The number one way is to visit the Bahamas. The Bahamas economy is completely dependent on tourism, and a reduction in numbers would spell further catastrophe to the islands and their people.
