Introduction

Global Bicycle Tire Market

From times earliest bicycles have proved themselves quite useful in human lives. They were primarily used for transportation, but gradually it has found importance in racing and passion of some people too. The entire issue of safety of the rider depends upon the tires that are used. These tires are of several types which are made according to the requirement of the rider, for instance, or he children or even disabled people yet to get balance upon two wheels, there are pneumatic detachable tires which can be removed from the bike when necessary. Moreover, for mountains and rugged roads the exterior of the tire needs to be quite strong and tight. The Bicycle Tire markets thus are expected to keep all these details in mind to meet the demands of the customers.

Currently, mountaineering and bicycle racing are very popular sports amongst the young generation. On the contrary, old and retired people take on to casual riding for vacation or normal physical exercise. This indeed increases the demand for bicycles which in turn prepare the ground for the robust growth of the Bicycle Tire market. Besides this, proper infrastructure and application of modern science are the inevitable factors that help the Bicycle Tire shine in the global market.
