

Fish Protein Concentrate Market 2019- Global Industry Analysis, By Key Players, Trends and Forecast By 2025

PUNE, MAHARASHTRA, INDIA, September 18, 2019 /EINPresswire.com/ -- Summary:
A new market study, titled "Discover Global [Fish Protein Concentrate Market](#) Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

Introduction

Global Fish Protein Concentrate Market

Fish Protein Concentrate is any stable fish preparation, which is prepared from fish by extracting out the protein by different processes and is thus intended for human consumption. The protein extracted is more concentrated than found in the original fish.

The production of Fish Protein Concentrate goes long back, a vase was found in the Pompeii bore an inscription claiming that the best Liguamen in the world was manufactured in Umbricus Agathapus, a Liguamen is a kind of Fish Protein Concentrate. Moreover, in the eighteenth century, Norwegians exhibited a biscuit containing fish flour at an international exhibition. Recently, with developments in technology, manufacturers were able to produce Fish Protein Concentrate on a large scale with extensive endeavors.

Fish Protein Concentrate is produced by a chemical process or by a biological process. The chemical process is carried out by solvent extraction, while the biological process involves the enzymatic digestion of the raw fish. The digest, thus obtained, is then dried to produce a functional powder. The raw materials used to make Fish Protein Concentrate are fresh fish of almost any kind or size, or fish meal. The fish is kept in cold storage immediately after it is captured and then the factory starts processing it. The nutritive value remains the same if the fish stored is within the defined time limit.

Fish Protein Concentrate is a great source of protein. The quality of the protein is very high. It contains the amino acid, which makes up the protein and is present in the right proportion for human nutrition. It is incorporated while preparing soups and stew, bread, biscuits, etc. at a level that retains their normal properties. They can also be used in macaroni products, milkshake, spaghetti sauce, infant foods, dietetic foods, and breakfast cereals.
