Description

Moulds (or molds) and dies are used to make a variety of objects with many different media. For instance, plastic plumbing pipes can be made in a mould; tools such as wrenches are cast in dies. Moulds tend to be used to produce products that need to be hollow in the middle, whereas dies are used to stamp solid products out of media such as steel. Mould, known as "the mother of industry," is developing in the technology and investment-intensive direction.
