Evidence of resource degradation combined with the towering food requirements of the rapidly increasing population has presented a host of challenges to the sector. The growing depth of poverty and hunger has evoked major food security concerns on a global level. Climate change and water scarcity are major concerns surfacing the industry. To address these issues, the agriculture sector has adopted various measures to eradicate the problems which would help to eliminate the issues of hunger and malnutrition. Moreover, with the shift in food consumption patterns and the growing affluence of consumers, the demand for healthier food items have increased.
