

# Big Data 2019 Global Market Size, Status, Analysis and Forecast to 2030

---

*WiseGuyReports.Com Publish a New Market Research Report On –“ Big Data 2019 Global Market Size, Status, Analysis and Forecast to 2030”.*

PUNE, INDIA, September 19, 2019 /EINPresswire.com/ --

## [Big Data Industry 2019](#)

Description:-

Big Data is a term commonly used to describe a large volume of data which can't be stored in traditional databases. As a result, it is virtually impossible to store, capture, and analyze the data for an old database.

Due to digitalization, the scope for Big Data expanded significantly. In recent time, big data doesn't refer to data itself, but it also includes the process to store and analyze the high magnitude of complex data.

Big data often described by terms like petabytes or exabytes. It normally consists of trillions of record of billions of people from varying sources. Sales, customer contact center, mobile data, data from social media, and web are generally stored as Big Data.

Latest news

In a recent development, India is planning to digitally map the entire country with drones with the help of artificial intelligence and big data.

The test project is undergoing successfully in some of the regions like Haryana, Maharashtra, Karnataka, and the Ganga basin.

The process is quite complex as it will not use the satellite data and completely dependent on drones for higher resolution.

Recently, Google announced a tool which can analyze the big data without hampering customer's privacy. The tool can analyze the data but without knowing the source. As a result, the concern over privacy can be minimalized.
