

# Aluminum Composite Panels Market 2019, Global Industry Analysis, Size, Share, Growth, Trends and Forecast - 2024

*A New Market Study, titled "Aluminum Composite Panels Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.*

PUNE, INDIA, September 20, 2019 /EINPresswire.com/ -- Summary

A New Market Study, titled "Aluminum Composite Panels Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

This report provides in depth study of "Aluminum Composite Panels Market" using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Aluminum Composite Panels Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

This market report offers a comprehensive analysis of the global Aluminum Composite Panels market. This report focused on Aluminum Composite Panels market past and present growth globally. Global research on Global Aluminum Composite Panels Industry presents a market overview, product details, classification, market concentration, and maturity study. The market value and growth rate from 2019-2025 along with industry size estimates are explained.

Aluminum composite panel (ACP) also aluminum composite material (ACM) is a type of flat panel that consists of two thin aluminum sheets bonded to a non-aluminum core. Aluminum sheets can be coated with PVDF, fluoropolymer resins (FEVE) or Polyester paint. Aluminum can be painted in any kind of color, and ACPs are produced in a wide range of metallic and non-metallic colors as well as patterns that imitate other materials, such as wood or marble. The core is commonly low density polyethylene, or a mix of low density polyethylene and mineral material to exhibit fire retardant properties. ACPs are frequently used for external cladding or facades of buildings, insulation, and signage.

Key manufacturers are included based on company profile, sales data and product specifications etc.:

3A Composites  
Alcoa  
CCJX  
Goodsense  
HongTai  
Yaret  
Mitsubishi Plastic  
Seven  
Sistem Metal  
HuaYuan

Jyi Shyang  
Multipanel  
Pivot  
Walltes  
LiTai  
Vbang  
Litong  
Alstrong  
Almaxco  
Alucoil  
Daou  
FangDa  
Genify  
HTALU  
Shuangou  
Xianfeng  
Kaidi  
Mulk  
Hongseong  
Laminators  
Interplast

## Market Overview

An aluminum composite panel or an aluminum composite panel is a sandwich panel. In simple terms, a sandwich panel is known as a structure that is made of three layers, i.e., a low-density core along with a thin skin-layer bonded to each of the sides. These panels are common where a combination of high structural rigidity and low weight is necessary. They are popular due to the volume of their applications, which is quite varied. This is because of the combination of the materials used and its lightness. However, the materials used for the core and the skin can greatly vary according to the requirements. This also adds to up the versatility of this technology.

Apart from aluminum composite panels (ACP) that are made up of aluminum composite material (ACM), there are two other commonly known types of sandwich panels. These are 3D-printed biopolymer panels and structural insulated panels or SIPs. However, coming back to ACPs, their use and applications are both external and internal. They can be used for architectural cladding, partitions, false ceilings, signage, construction sign panels, container construction, and so on. As you may guess, the market for such applications is not only humongous but also growing. The main reason for this is because most of its uses and applications are absolutely indispensable. Its thermal resistance, acoustic insulation, fire behavior, mechanical properties, and impermeability makes it an asset of unparalleled value. Although the code of practice puts a restriction of how and where it can be sold, it is to maintain and control the quality of such an important material. The report published in HeyReport on the global aluminum composite panels market revealed the growth to be at a notable pace. The valuation of the aluminum composite panels market was further stated to surpass its previous valuation.

## Market Segmentation

The global aluminum composite panels market has been segmented in terms of type and applications.

By type, the market includes Anti-bacteria, Anti-fire, and Antistatic. The anti-bacterial segment of the market is reported to attract major demand in the coming years.

By application, the market is segmented into interior decoration, building curtain wall, and others. The interior decoration market segment is highly popular and is expected to garner massive share percentage over the forecast period.

## Regional Analysis

The global aluminum composite panels market is geographically distributed across the following key regions: Latin America, Asia Pacific, North America, Europe, and the Middle East and Africa. The presence of a vast pool of players in the North American region is boosting the growth of the market herein.
