MINNEAPOLIS, MINN., U.S., September 30, 2019 /EINPresswire.com/ -- Nor-Tech, a leader in the global HPC industry, just added 10 AMD EPYC Rome processors to its no-cost, no-obligation demo cluster. The processors were integrated in a variety of configurations to accommodate a range of applications. Other recent additions to the demo cluster include:
•2019 Nice DCV
•Open OnDemand: a leading-edge application that simplifies open source
•Intel Cascade Lake SP and AP
•Intel Optane Memory
•Apache Pass Non-Volatile DIMM (NVDIMM)

Nor-Tech's demo cluster is a no-strings opportunity for current and prospective clients to test-drive the latest hardware and software on cutting-edge Nor-Tech HPC technology. Demo cluster additions expected in the near future will include DDR 3200 memory.
Users can also integrate their existing platforms into the demo cluster. Once a job is run, the submitter will get an email that documents the actual results vs. what they are currently using. Nor-Tech's Executive Vice President Jeff Olson said, "Our demo cluster is an excellent way for clients and prospective clients to witness the actual return-on-investment of processor upgrades. They can run jobs and document the

performance gains that will justify an investment in upgraded processors to management."
Nor-Tech will sign a confidentiality agreement on request.

Nor-Tech is on CRN's list of the top 40 Data Center Infrastructure Providers along with IBM, Oracle, Dell, and Supermicro and is also a member of MIT Technology Review's Global Advisory Panel. The company is a high performance computer builder for 2015 and 2017 Nobel Physics Award-contending/winning projects. Nor-Tech engineers average 20+ years of experience. This strong industry reputation and deep partner relationships also enable the company to be a leading supplier of cost-effective Lenovo desktops, laptops, tablets
