

Manganese Powder Market 2019 Global Share, Supply, Demand, Segmentation and Forecast to 2025

Wiseguyreports.Com Adds "Manganese Powder 2019-2025 Global Market Survey Industry Key Players – ESPI Metals, KammanGroup, Erachem" To Its Research Database

PUNE, MAHARASTRA, INDIA, October 1, 2019 /EINPresswire.com/ -- Manganese Powder Market 2019-2025

Description: -

Manganese is a chemical element, which is found in combination with iron ore. It appears to be silvery in color. It is hard and too brittle to be used as a metal. Manganese powder

with the molecular formula of MNO2 is blackish or brown in appearance. Its common ions are paramagnetic in nature. Most of the time, it is used as an alloy material. Naturally found Manganese powder (Manganese Dioxide) contains impurities, which is chemically removed before utilizing it for different applications.

Global Manganese powder is flourishing due to its increased use in industrial applications. It is used to produce high-quality stainless steel, high strength low alloy steel, aluminum, and copper manganese alloys. Manganese powder is useful to protect steel or iron objects from rusting effect. Manganese powder is used in Pharmaceutical industries as well to develop medicines for manganese deficiencies, which causes osteoporosis, osteoarthritis and other conditions such as wound healing. Manganese powder is widely used to produce dry cell batteries. It is also used in glass & ceramic industry for coloring purposes.

Manganese powder has an adverse effect on the people working with it. It is unsafe when inhaled for a long period of time. Hence, strong regulatory practices are getting implemented worldwide to create awareness programs. Ensuring safety for the operating personnel in different industries are becoming a standard practice.

The major manufacturers covered in this report

ESPI Metals, KammanGroup, Xiangtan Electrochemical Scientific, Erachem Comilog, Tosoh, Delta Emd, Cegasa, Tronox, Hickman, Williams, Belmont Metals, Milward Alloys, Sipi-Metals, Mil-Spec Industries, Chemalloy,

Segments:

Global Manganese powder market is rapidly growing, which makes it essential to study the different products and their application, to take full advantage of the opportunities it provides. Manganese powder can be segmented by its product type based on its purity index. Manganese powders are termed as 2N, 3N, and 4N based on its impurity content. Manganese powder of different grades is widely used in Steel, pharmaceutical, glass & ceramic industries. Growing demand from Electronic and automobile industries have raised demand for normal and lithiumion batteries, which can contribute to the growth of Global Manganese powder market.

Regional Analysis:

Global Manganese powder market can be regionalized into Europe, North America, South America, Asia Pacific (APAC) and the Middle East & African nations (MEA) for better understanding of the market potential. North America is observing the growth due to its superior industrial infrastructure, where manganese powder is used as the strength enforcing medium. The pharmaceutical market is driving the growth in both European and APAC regions. Industrial growth is also a major contributing factor for the manganese powder market growth in APAC, whereas, glass & ceramic industry is giving traction to the market in Europe. Various producers of manganese powder are investing in to increase its production and expand its application to newer sectors as well.

Industry News:

Global drive in eco-friendly energy source and rise in electric automobile sector is fueling the demand for battery. Manganese powder production is receiving traction from the demand in battery sector. Such intense traction due to rise in sales of battery-driven cars, countries like India opting for battery-driven car infrastructures, and other factors can impact the market for magnesium powder.
