Factors affecting the growth rates

There is a slew of factors that affect the growth prospects of the industry. The rapid globalization, need for organic food items, and advanced preservative methods have helped the industry grow

by leap and bound.

Companies need regular updates about the food items, and most advanced solutions come up with regular updates about the condition of the food items and the exact locations of the vehicle in transit.

However, massive accidents can spoil the entire setup. The losses would be gigantic, and hence most companies do not prefer the methods. On the other hand, the air transportation systems have been preferred over the traditional perishable goods sea transportation system. Unlike sea transportation, the items reach the destined locations in a couple of days. The price difference has been a major factor too. To mitigate the losses, vendors all across the world have come up with unique solutions.

Major geographies

The perishable goods sea transportation system has a global presence and is a huge hit among companies all over the world. The United States is the largest supplier of dairy-based products have emerged out as one of the key regions with great potentials.

On the other hand, the Asia Pacific region also show some positive sign of growth, and the industry is expected to flourish in the region.

Latest News:

The global perishable goods sea transportation industry hit a major high in the year 2018, and the industry is believed to expand further at a compound annual growth rate of xx percent for the next few years. By the year 2025, the industry is believed to be cross a major milestone.
