

Solar Photovoltaic Cell Market 2019, Global Industry Analysis, Size, Share, Growth, Trends and Forecast - 2024

A New Market Study, titled "Solar Photovoltaic Cell Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

PUNE, MARKETERSMEDIA, INDIA, October 11, 2019 /EINPresswire.com/ -- Summary

A New Market Study, titled "Solar Photovoltaic Cell Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

This report provides in depth study of "Solar Photovoltaic Cell Market" using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Solar Photovoltaic Cell Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

This market report offers a comprehensive analysis of the global Solar Photovoltaic Cell market. This report focused on Solar Photovoltaic Cell market past and present growth globally. Global research on Global Solar Photovoltaic Cell Industry presents a market overview, product details, classification, market concentration, and maturity study. The market value and growth rate from 2019-2025 along with industry size estimates are explained.

Key manufacturers are included based on company profile, sales data and product specifications etc.:

Alfa Aesar

BASF

Dyename

Fujifilm

Fujikura

Greatcell Solar

Hangzhou Microquanta

Infinitypv

Jinkosolar

Kyocera

LG Chem
Merck
Oxford PV
Panasonic
Saul Technologies
Sharp

The latest advancements in Solar Photovoltaic Cell industry and changing market dynamics are key driving factors to depict tremendous growth. Also, the risk factors which will have a significant impact on the Global Solar Photovoltaic Cell industry in the coming years are listed in this report. The revenue-generating Solar Photovoltaic Cell types, applications, and key regions are evaluated. Top growing regions and Solar Photovoltaic Cell industry presence cover Asia-Pacific, North America, Europe, Middle East, African countries and South America. This Solar Photovoltaic Cell business study also analyzes the top countries in these regions with their market potential.

Market Overview

Solar energy has the advantage of being abundantly available. It just needs to be harnessed by the right tools. One of the leading batteries in the market these days is the solar photovoltaic cell. This is commonly referred to as the PV cell. This cell converts photons (light energy) into electrical energy. When light is absorbed by the semiconductor inside the battery, this energy is transferred to the electrons and then flows through as current.

There are different battery technologies that a solar photovoltaic cell uses. Out of these, the lead-acid types have higher reliability and low discharge and are being used in a lot of applications. Lithium-ion batteries are also a type used. However, since these are about 3.5 times more expensive than lead-acid types, they are not preferred. The third type of battery technology is the nickel-cadmium PV batteries. This report talks about the different types of batteries and their scopes for growth.

This further explains market conditions that existed in the past, in the present and forecasts the same for the future. The need for alternate energy sources and the incentives given by the governments of different countries for harnessing solar energy are both opportunities for market growth. The high cost of solar photovoltaic cell materials is a restraining factor. The detailed analysis of the market and its potential for improving are investigated in the report.

Market Segmentation

There are two basic types of solar photovoltaic cells that the market produces. This report picks up both these models and discusses the pros and cons in detail. Crystalline Silicon is the first type the report considers. This is a very common material and most of the PV cells produced to

date use silicon. Thin-Film photovoltaic cells are the second type and the report estimates that this type will grow much better than the former because of its various advantages. There are three areas of application or usage that the report identifies. Automotive, construction and industrial and their potential demand for these PV cells are spoken about.

Regional Analysis

The top regions that produce and demand solar photovoltaic cells are North America, Europe, Southeast Asia, India, China, and Japan. This report identifies the top regions that will hold the major market share in the coming years and forecasts their position for the years between 2019 and 2025. The report also identifies the export and import numbers of these regions and their projected revenue. The different key players in the industry are pointed out and the submarkets that are created are also specified. The report helps identify market drivers and the risk factors of establishing business in all these regions.

Major Key Points in Table of Content

1 Global Market Overview

2 Regional Market

3 Key Manufacturers

4 Major Application

5 Market by Type

6 Price Overview

7 Conclusion Fig Global Solar Photovoltaic Cell Market Size and CAGR 2013-2018 (Million USD)
