Baby feeding bottles are the bottles which are primarily used by the baby for drinking water and at times used for drinking water. The bottle consist a nipple, collar and cover of the bottle. The shape of the nipples comes under different sizes in accordance to the convenience of the babies. The bottles come under different sizes and designs. In the recent time, manufactures are focusing on showing the safety and convenience of the bottles. They have manufacturing BPA-free bottles to attract the crowd. These bottles are used to feed baby infant formula as they are easy to hold and very convenient.

#### Demand Scenario

The global baby feeding bottles market was USD 2624.45 million in 2018 and is estimated to reach USD 3483.93 million by 2025 at a CAGR of 4.13% during the forecast period

#### Growth by Region

Asia Pacific is the current profitable region and is forecasted to be the dominant region in this market. The major reason of this is attributed to the higher birth rate among other regions. Rest of the regions will grow at an average rate.

#### Drivers vs. Constraints

The increase in the infant formula market led to increase in growth in the baby feeding bottles. Parents find these bottles easy to use, durable and easy to store. This positive outlook helps in market growth. The companies are producing the individual parts of the bottle which make it very convenient for the user to modify the bottle according to their needs. This positive outlook helps in market growth. However, the harmful BPA mixes with milk over the time and become harmful for the baby as it affects the brain and health of the baby. Also many doctors recommend breast feeding because many doctors do not find need to use these bottles. All these factors hinder the market growth.

#### Industry Structure and Updates

- March 2017 – Olababy introduced first line of Non-silicone toxin free bottles for babies. This bottle is sage to use and have all the characteristics which a good bottle should possess
- June 2018 – Como Tomo organised an event where where they launched their best ever product where ease the moms to transfer their milk to the bootle without ejection. Many soon-to-be moms’ and moms were invited to the event.
- February 2018 – Tommee Tippee announced its new Advanced Anti-Colic baby bottle that is designed and proven to reduce colic. It also includes a new heat sensing feature for milk temperature.
